Self-Hosting

Introduction

There are several platforms I self host on this server, this will outline some of them!

I generally run either Debian or CentOS on my home servers (and VPN instance). On my testing box, I use Proxmox to run VMs.

Here are some things you can host!

- Web apps/services
 - DokuWiki (Knowledge base)
 - PeerTube (Video sharing)
 - Nextcloud (File sharing/cloud)
 - Gitea (Git server)
- Other
 - Wireguard (VPN)
 - OpenMediaVault (NAS)
